Professional Summary

Computer Science graduate with an interest in software development and problem-solving. Enjoy learning new technologies and building practical projects while continuously improving my programming and Data Structures & Algorithms skills. Seeking an entry-level Software Engineer opportunity to learn, contribute, and grow.

Education

NRI Institute of Technology, Agiripalli <i>Bachelor of Technology – Computer Science Engineering (AI & ML)</i> Percentage: 85%	2026
Sarada College, Vijayawada <i>Intermediate – MPC</i> Percentage: 88%	2022
Ravindra Bharathi Public School, Vijayawada SSC Percentage: 88%	2020

Skills

Languages

Python
Java(Basic)

Databases

MySQL, MongoDB

Tools

Git, GitHub, Bazel, Jupyter Notebook

Web Development

HTML, CSS, Flask, Node.js, Express.js

Core Concepts

Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems (Basics), Computer Networks (Basics)

Internships & Experience

Codegnan IT Solutions <i>Generative AI Intern</i>	05/2024 – 07/2024 Vijayawada
• Learned the fundamentals of NLP and Generative AI through hands-on tasks. • Worked on text generation and summarization using Python. • Performed data preprocessing and basic model evaluation. • Collaborated with mentors during project discussions and review sessions.	

Certifications

- Joy of Computing using Python (NPTEL)
- Cloud Computing(NPTEL)
- Microsoft Certified: Azure Data Fundamentals

Projects

Real-Time Chat Application [↗](#)

Developed a one-to-one real-time chat application enabling authenticated users to exchange messages instantly.

- Implemented user registration and login using **Node.js**, **Express.js**, and **MongoDB**.
- Integrated **Socket.IO** [↗](#) for real-time messaging without requiring page refresh.
- Developed a responsive user interface using **React.js** and connected it with backend REST APIs.
- Debugged and resolved real-time message synchronization issues to improve message delivery reliability.

Technologies: React.js, Node.js, Express.js, MongoDB, Socket.IO [↗](#)

Student Management System using Bazel [↗](#)

Developed a console-based Student Management System in C++ using the Bazel build system to manage student records.

- Implemented functionalities to add, search, display, and remove student records using object-oriented programming concepts.
- Structured the project using **Bazel** with BUILD.bazel and MODULE.bazel for efficient project organization and builds.
- Organized the code into separate header and source files to improve modularity and maintainability.
- Currently enhancing the project with additional features and persistent file storage.

Technologies: C++, Bazel

House Price Prediction using ML

- Built a machine learning model to predict house prices using Linear Regression and Ridge Regression.
- Performed data preprocessing, feature selection, and model evaluation on the Kaggle House Prices dataset.
- Trained and evaluated the model using Python and Scikit-learn.

Technologies: Python, Pandas, NumPy, Scikit-learn

Achievements

- 1st Place – Code Sankalp (Python Coding Competition), Sunrise 2K25, NRI Institute of Technology (2025).
- Solved **100+ Data Structures & Algorithms** problems on LeetCode.
